Technical Advice

Ceiling Fan Selection

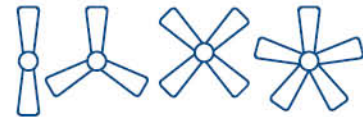

How to select your fan?

Sweep Size is referred to the entire diameter of a fan.

Speed (RPM)	Air Delivery (CFM)
315	240

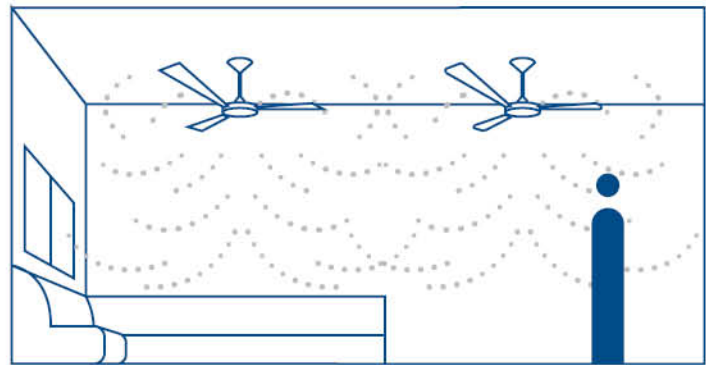

Higher RPM does not mean higher air flow. Air flow / Air delivery is the only point of comparison in selecting a ceiling fan.

More fan blades may not give better air flow.

A four or five blade ceiling fan provides a more conventional, balanced look, whereas a fan with two or three blades possesses a modern and sleek style.

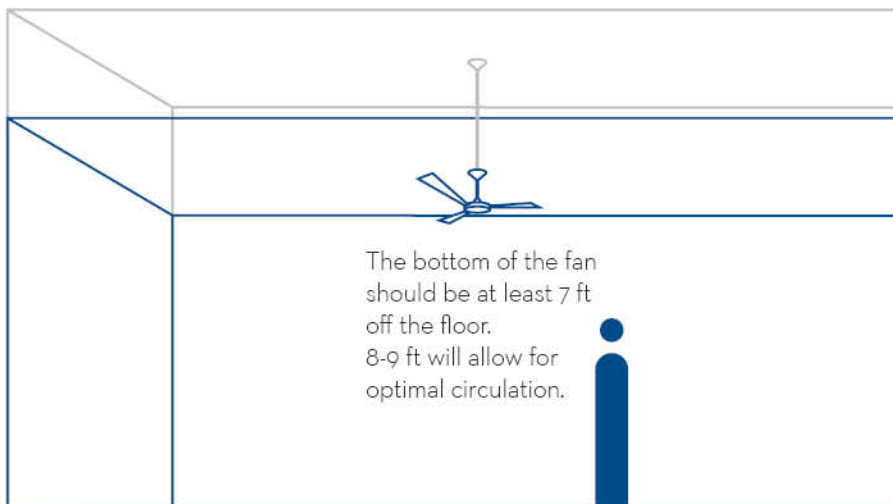

Sweep Size	Room Size
600 mm (24")	Small shop, cabin or Powder Room
750 mm (30")	6 X 10 ft
900 mm (36")	7 X 10 ft
1050 mm (42")	10 X 10 ft
1200 mm (48")	12 X 13 ft
1300 mm (52")	13 X 14 ft
1400 mm (56")	14 X 16 ft

For a much more larger room, consider using two fans to balance the air circulation in all parts.

Optimal Height

For ceilings that are taller than nine feet, add 6" to the downrod for every foot of height.

The more space between the ceiling and the blades, the better for air flow and circulation.

- 10 ft
- 9 ft
- 8 ft } Optimal height
- 7 ft
- 6 ft

- 2 ft

We Present to you our wide range of energy efficient ceiling fans which are compliant with the new standards set out by Indian Bureau of Energy Efficiency.

New Star Rating System

$$\text{Service Value} = \frac{\text{Air Delivery (m}^3/\text{min)}}{\text{Wattage (W)}}$$

Higher the service value (air delivery/watt), better is the star rating of the fan!

AURA2

Aura2 comes with a 5 year warranty powered by Duratech technology. Duratech uses premium components, designed to deliver a superlative performance over the years.

Here's a quick look at the key components that form the core of the Duratech technology.

Duratech comprises of:

High Endurance Box Capacitor

Aura's high-endurance box capacitor, with a patented adapter, ensures superior performance over a longer period as compared to ordinary oil-filled tube-type capacitors.

High Grade EMQ Bearing

EMQ bearings used for the Aura motor are the highest-grade bearings available for fans. They are silent and smooth, and have the additional advantage of reduced friction and vibration.

Dual Coat Winding

Dual-coat winding, offers double protection, ensuring better insulation and abrasion resistance when subjected to high temperatures and sudden overloads. This results in longer durability as compared to ordinary winding.

High Standard Hybrid Steel

Aura fans use hybrid steel which is highly compatible with electric motors. The composition and the thickness of the steel ensures fan durability and efficiency.
